display means for displaying selected account items from the accounts identified by the two or more links of the first data structure.

16.   (Amended)   A method for displaying account information from two or more accounts that are stored in one or more account database, wherein each account includes one or more account items, the method comprising:

providing a first data structure having two or more associated links, wherein each link identifies one or more of the accounts; and

displaying selected account items from the accounts identified by the two or more links of the first data structure.

24.   (Amended)   A method for providing a formatted output of selected fields of a database for a computer program with a merge capability, wherein the database includes a number of database entries each having two or more fields, and each field having a field value, the method comprising:

identifying the database entries that have one or more fields with a field value that matches a selected query or expression; and

outputting a formatted output that includes the field value of a selected field of each database entry identified by the identifying step, wherein the formatted output is formatted as a merge document that can be read by the computer program with the merge capability.

25.   (Amended)   A method according to claim 24 wherein the computer program is a word processing program.

26.   (Amended)   A method according to claim 24 wherein the computer program is a publishing program.
